Action Information		
Description: OSC Hoppe has been monitoring the situation. Con Edison has PFT Vans that monitor for a gas released from the transmission lines and have isolated the leak to two potential areas in Manhattan. At this time there is no evidence of release to a waterway and the NRC report was a "leak watch" report. CON ED's ERT is monitoring areas between 130-70th streets in Manhattan, on the West Side. A second conference call is scheduled for 7/22/2010 at 1500 for CON ED responders. EPA will monitor for updates. The exact area of the line break(s) has not been pinpointed.
